PROJECTS

E-Learning Website:

[Live Site](#) | [Github \(client\)](#) | [GitHub \(Server\)](#)

- It's an online based course learning website where a user can learn about course details and prices
- The courses have been categorized where users can choose what type of courses he/she likes to find.
- There is an option called download the pdf, where users can download course full details as pdf format.
- There is also an option called Get Premium Access, where in order to purchase the course users need to register.
- Registration and login has been implemented by Firebase Authentication system
- There are three types of registration system available: Email/password, Google and GitHub.

Technology Used: HTML, CSS, Bootstrap, React.js, Node.js, Express.js, Firebase

Bike-Reseller Website:

[Live Site](#) | [Github \(client\)](#) | [GitHub \(Server\)](#)

- This is a second hand bike buy and sell website.
- There are three types of users that have been implemented: Buyer, Seller and an Admin.
- A buyer can see the ads available on this website and give the seller a notification by clicking the book now option available on bike details.
- A seller can post bike details where they will be available on the bike categories.
- The admin can see how many users and sellers registered on this website and he can delete any user from the website.

Technologies Used: Tailwind, React.js, JSON Web Token (JWT), Node.js, Express.js, Firebase, Vercel

Quick-Quiz Website:

[Live Site](#) | [Github](#)

- This website is based on simple question answers.
- There are four types of quiz available.
- Any authorization has not been implemented, any user can take part in the quiz.
- If a user selects a correct or incorrect answer there will be a toast popup that appears where the user can see if his/her answer is correct or incorrect.
- Finally there is an Eye Icon, by clicking that icon the user can see the correct answer.

Technologies Used: HTML, CSS, Bootstrap, React.js, Node.js, Express.js, Toast, Netlify
